Development Skills

HTML5 | CSS | JavaScript | jQuery | Bootstrap | NodeJS | Express | MySQL | MongoDB
GraphQL | Mongoose | React | Sequelize | Handlebars | Apollo

Projects

[InterActor](#) (2021–In Development) – Team Leader, Creative Director

Allows users to search common films between two or more actors—a solution for fans who are seeking more of specific actor combinations and chemistries.

HTML5, CSS, JavaScript, React, GraphQL, MongoDB

[The Weather Dashboard](#) (2021) – Creator

A web tool that accesses a weather API and allows users to search for cities and display corresponding weather conditions as well as a five day forecast.

HTML5, CSS, JS

[README Generator](#) (2021) – Creator

A command-line application that generated a professionally formatted README.md file. Streamlines an integral part of the development process and used consistently for personal and professional projects.

JavaScript, NodeJS, Inquirer package
